NOTICE

Date: 05/10/2023

All students are hereby informed that the NSS Unit of Nur Mohammad Smriti Mahavidyalaya is going to organize a "Tree Plantation & Dengue Awareness Programme" on 11th October 2023 (Wednesday).

□ Details of the Programme:

- **Date:** 11/10/2023
- **Time:** 11:00 AM onwards
- **Venue:** College Campus and Nearby Locality
- **Organized by:** NSS Unit, Nur Mohammad Smriti Mahavidyalaya

□ Activities Include:

- Tree Plantation Drive
- Dengue Awareness Campaign (Poster display, cleanliness drive, awareness talks)
- Community interaction and leaflet distribution

□ Purpose of the Programme:

- To promote environmental awareness through tree planting
- To spread awareness about dengue fever and its prevention
- To engage students in community service and health education

All NSS volunteers and interested students are requested to actively participate in this programme. Participation certificates will be provided.

For further details, contact the NSS Programme Officer.

Let us come together to build a greener and healthier tomorrow!

Report

On

Tree Plantation and Dengue Awareness Programme

Organised by NSS Unit,
Nur Mohammad Smriti Mahavidyalaya
Date: 11/10/2023

The NSS Unit of Nur Mohammad Smriti Mahavidyalaya successfully organised a **Tree Plantation and Dengue Awareness Programme** on **11th October 2023** within the college campus and surrounding localities. The programme witnessed the active participation of **students and members of the NSS Unit**, along with the **faculty members** and the **Teacher-in-Charge (TIC)** of the college.

Importance of the Programme

The dual initiative of planting trees and spreading awareness about dengue reflects the commitment of the NSS Unit towards **environmental sustainability** and **community health**. Tree plantation is essential not only to enhance the green cover but also to combat pollution, support biodiversity, and contribute to a healthy ecosystem. On the other hand, the increasing number of dengue cases in various regions highlights the urgent need for **preventive education** and **awareness among the public**, especially in rural and semi-urban areas.

Objectives of the Programme

1. To promote environmental consciousness among students and the community through active tree planting.

2. To educate participants and locals about dengue fever, its causes, symptoms, and preventive measures.
3. To encourage cleanliness and sanitation practices to eliminate mosquito breeding grounds.
4. To develop a sense of social responsibility among NSS volunteers and students.
5. To foster community involvement in both environmental protection and public health safety.

Activities Conducted

- Planting of saplings in and around the college premises.
- Distribution of pamphlets and posters about dengue prevention.
- Street-corner awareness talks by NSS volunteers.
- Faculty-led sessions on the scientific and medical aspects of dengue.
- Cleanliness drives in nearby areas to remove stagnant water and potential mosquito breeding sites.

Outcome of the Programme

The programme had a **positive impact** on both the participants and the local community. Over **50 saplings** were planted, contributing to the beautification and ecological balance of the campus. Students became more aware of their role in environmental and public health initiatives. The dengue awareness campaign helped spread crucial knowledge about **early detection and prevention**, potentially reducing the risk of future outbreaks in the area. The local community appreciated the initiative, and many pledged to maintain cleanliness and follow the suggested preventive steps.

Conclusion

The Tree Plantation and Dengue Awareness Programme was a **meaningful and impactful event**, reflecting the values and social commitment of Nur Mohammad Smriti Mahavidyalaya. The NSS Unit successfully mobilised youth energy towards constructive and socially responsible action. It is hoped that such programmes will continue to be organised in the future to build a healthier and greener society.
